Summary

Junior AI Engineer specializing in Arabic NLP, LLM-powered systems, RAG pipelines, and production-grade APIs. Hands-on experience building end-to-end AI applications using FastAPI, LangGraph, Docker, vector databases, and multi-provider LLM integrations. Strong background in machine learning, conversational AI, Arabic text processing, prompt engineering, and evaluation workflows, with award-winning academic and DEPI AI projects.

Technical Skills

AI / ML: NLP, LLMs, RAG, Conversational AI, Prompt Engineering, LLM Agents, Agentic Workflows, Semantic Search, Embeddings, NER, Text Classification, Arabic Text Processing

Frameworks: PyTorch, TensorFlow, Scikit-learn, Hugging Face Transformers, LangChain, LangGraph, NLTK

Backend / APIs: Python, FastAPI, REST APIs, Pydantic, SQL, C++

Vector DB / Data: Qdrant, pgvector, FAISS, ChromaDB, PostgreSQL, MS SQL Server, Oracle

Deployment / MLOps: Docker, Nginx, Prometheus, Grafana, API Integration, Git, GitHub

Cloud: Microsoft Azure, Groq, OpenRouter, OpenAI, Cohere

Exposure: Flask, Django, Java, C#

Projects

SoukAI 🔗 , Arabic E-commerce Customer Support Triage Agent Tech: Python, FastAPI, LangGraph, Arabic NLP, NLTK, LLM APIs, Groq, OpenRouter, Meta Webhooks, Facebook Graph API - Implemented a controlled FastAPI/LangGraph workflow for input validation, Arabic normalization, safety filtering, intent classification, entity extraction, order lookup, KB retrieval, routing, escalation, and Arabic response generation. - Added safety checks for profanity, abusive content, spam, and prompt injection before LLM response generation. - Integrated Facebook Page webhooks to process new comments through the agent flow and reply automatically. - Created an evaluation pipeline with classification metrics, routing metrics, latency/cost tracking, trajectory logs, and rubric-based LLM-as-judge evaluation. - Tested on 71 labeled examples, achieving a 73.24% response pass rate.	06/2026
Baseer 🔗 , RAG-based LLM System with Vector Search & OCR Pipeline - Designed and deployed an end-to-end RAG pipeline for document intelligence using OCR, embeddings, vector search, and LLMs. - Integrated multiple LLM providers, including OpenAI, Cohere, Hugging Face, and Groq. - Used pgvector and Qdrant for semantic search and retrieval over Arabic documents. Fine-tuned Qwen2-VL using LoRA for OCR accuracy improvement and structured output extraction. Deployed the system using Docker, Nginx, Prometheus, and Grafana.	04/2026
Alan 🔗 , Arabic Virtual Patient for Medical Training - Led development of an AI-powered medical simulation system for Arabic-language clinical training. - Integrated Whisper STT, LLM-based dialogue generation, and Arabic TTS pipelines. - Developed a full-stack system using Flutter, FastAPI, and PostgreSQL. - Ranked 1st at the Faculty of Computer Science and Artificial Intelligence and 3rd overall at Cairo University.	06/2025

Work Experience

GB Corp Ghabbour Foundation, Programming and AI Instructor • Deliver hands-on training in IT Systems, Python, DB Design, Data Structures, Algorithms, web application development, and AI/ML , emphasizing real-world applications . • Mentor students in applying programming, AI, and database knowledge to real-world projects.	07/2025 – Present Giza, Egypt
Digital Egypt Pioneers Initiative (DEPI), Microsoft Machine Learning Engineer Intern • Specialized in Machine Learning, Data Science, Deep Learning and Azure Cloud solutions. • Completed advanced tracks in teamwork, freelancing, and leadership. • Achieved 2nd place award in AI innovation competition.	04/2024 – 10/2024 Cairo, Egypt

Education

B.Sc. in Computer Science & Artificial Intelligence, Cairo University Specialization: Artificial Intelligence	2021 – 2025 Cairo, Egypt
---	-----------------------------

Certificates

Azure AI Engineer Associate AI-102  Microsoft	Microsoft Machine Learning Engineer Graduation Digital Egypt Pioneers Initiative (DEPI)
Advanced Learning Algorithms Stanford University	Unsupervised Learning, Recommenders, Reinforcement Learning Stanford University
Supervised Machine Learning Stanford University	ML Engineer Internship MENTORNESS
Leadership Digital Egypt Pioneers Initiative (DEPI)	Business English SYE English Community
Git and GitHub	

Awards

1st Place, Best Graduation Project Faculty of Computers and artificial Intelligence	07/2025
3rd Place, Best Graduation Project Cairo University level	07/2025
2nd Place, Best Graduation Project DEPI and CLS (AI Track)	11/2024

Soft Skills and Languages

Soft Skills • Leadership, Teamwork, Problem-Solving, Creativity, Adaptability, Communication	Languages • Arabic, English
